EDUCATION

University of Connecticut – College of Liberal Arts and Sciences

Storrs, CT

Bachelor of Arts in Cybersecurity, Crime and Justice

August 2022 – May 2025

- Cumulative GPA: 3.289/4.000 **Relevant Coursework:** Data Structures & Algorithms, Cybersecurity Lab, Introduction to Computer & Network Security, Introduction to Transformers, Network Design & Applications, Deep Learning

Nichols College

Dudley, MA

Bachelor of Science in Criminal Justice

August 2021 – May 2022

- President's List Fall 2021, Spring 2022

SKILLS

Programming: Python, Bash/Shell, PowerShell, SQL, HTML, C/C++, Claude Code

Systems & Cloud: Windows, macOS, Linux, Active Directory, Entra ID, Azure, AWS, VMware, Workspace ONE UEM, Docker

Security & Identity: SIEM, IAM, OWASP ZAP, Okta SSO, Duo MFA, Intune, JAMF, CrowdStrike, Zscaler, AgileBlue, Proofpoint, KnowBe4, Qualys, Microsoft Defender

Tools & Platforms: Splunk, Nmap, Nessus, Burp Suite, Metasploit, Git/GitHub, Jira, Microsoft 365, ABM, SnipeIT, ConnectWise, Druva, ManageEngine, SysAid, NinjaOne

Frameworks: HIPAA, HITRUST CSF, GxP, FedRAMP, ITIL, NIST CSF, NIST 800-171, CIS Controls, CMMC, ISO 27001, SOC 2

WORK EXPERIENCE

Consolidated Industries

Cheshire, CT

IT Junior Analyst

June 2026 – Present

- Deployed and configured SysAid ITSM platform organization-wide, establishing ticketing workflows, SLA definitions, and asset tracking processes from the ground up.
- Supported IT infrastructure management and end-user support operations, applying ITIL-aligned practices to incident tracking, change management, and service request fulfillment.
- Contributed to cybersecurity compliance initiatives aligned with CMMC and NIST SP 800-171 standards, assisting in gap assessments and control documentation efforts.

Ancilla LLC

Remote

IT Engineer Consultant

November 2025 – Present

- Administered macOS and Windows endpoints using ABM and Intune, managing OS provisioning, configuration profile deployment, and enterprise application packaging and distribution.
- Diagnosed and resolved Tier 1–2 incidents across endpoint, network, and identity layers, performing root cause analysis and implementing permanent fixes to eliminate recurring issues.
- Enforced device compliance and security baselines across the managed fleet via Intune and Entra ID, including conditional access policies, configuration profiles, and organizational security standards.

BioXcel Therapeutics, Inc.

New Haven, CT

IT Support Consultant

February 2026 – June 2026

- Supported enterprise IT operations across Windows, macOS, and iOS environments, resolving hardware, software, and network issues following ITIL best practices.
- Administered Active Directory, Microsoft 365, Vonage VoIP, CrowdStrike, AgileBlue, and KnowBe4 for endpoint security and user management.
- Managed IT asset lifecycle including provisioning, inventory tracking, licensing, procurement, and executive-level technical support.

ReferWell

Stamford, CT

Associate System Administrator

July 2025 – November 2025

- Administered contact center platforms including IVR workflows, call routing, queue management, and SMS/MMS configurations; maintained user provisioning in Active Directory.
- Built operational dashboards and reports in Excel using XLOOKUP/VLOOKUP to track contact center metrics and system performance.

PROJECTS

SIEM Simulation for Security Monitoring

Remote

Freelance Security Project

December 2025 – January 2026

- Designed and deployed a SIEM-based security monitoring lab to simulate real-world SOC workflows and alert triage.
- Ingested endpoint, authentication, and network logs; created correlation rules to detect brute-force attacks, suspicious logins, and malware indicators.

AgentGuard Enterprise

Remote

Freelance Security Project

August 2025 – October 2025

- Built a production-grade AI agent security and compliance platform using React 18 and Vite, featuring real-time threat detection, prompt injection monitoring, and automated mitigation workflows.
- Implemented multi-framework compliance tracking across SOC 2, HIPAA, and ISO 27001, with centralized agent deployment management and comprehensive audit logging.

Neural Network Intrusion Detection – Machine Learning

University of Connecticut Capstone Research

Storrs, CT

February 2025 – May 2025

- Built a Feedforward Neural Network using the UNSW-NB15 dataset to detect cyber threats with 91% accuracy, optimizing precision, recall, and F1-score.
- Applied SMOTE, binary classification, dropout, and LeakyReLU to handle class imbalance, reduce overfitting, and enhance anomaly detection.

LEADERSHIP

Nichols Fire Department

Volunteer Firefighter

Trumbull, CT

September 2021 – Present

- Responded to 400+ emergency incidents, showcasing quick decision making and crisis management under high-pressure situations.
- Conducted community safety workshops and training programs while completing 3+ certifications in firefighting and hazardous materials.

University of Connecticut Cybersecurity Club

VP of Club Initiatives

Storrs, CT

September 2023 – May 2025

- Organized hands-on workshops and training sessions on IT fundamentals, network security, SOC operations, and incident response, enhancing members' technical skills by 40%.
- Competed in National Cyber League (NCL) for three consecutive seasons, placing in individual and team game categories across OSINT, cryptography, log analysis, network traffic analysis, and web application exploitation.
